

Build a Simple Mad Libs

Learn how to build a simple Mad Libs game using the "Roses are Red" poem.

1. Open Wing IDE and create a new file. If you don't know how, look around until you find the icon to click.

2. Type the following in the upper-left corner:

```
adjective1 = raw_input("Tell me an adjective, and click enter. ")
noun1 = raw_input("Tell me a noun (plural), and click enter. ")
noun2 = raw_input("Tell me another noun, and click enter. ")
adjective2 = raw_input("Tell me an another adjective, and click enter. ")

print "Roses are " + adjective1
print noun1 + " are blue"
print noun2 + " is " + adjective2
print "And so are you!"
```

3. Click the green "play" arrow and play your game in the lower-right corner.

4. If it didn't work, look carefully at the code above to see if your code has any errors. Find the errors and fix them.

5. Add a title to your poem and make it print out above the poem.

6. Add a space between your title and the rest of the poem.

7. Copy and paste your code into the discussion area below.
